SUBJECT INDEX

Aerosol deposition restricted to the nose in beagle dogs, technique for, 519
Agent VX, toxicity of an acute dose in the chicken, 103
Arsenical inhibition of tyrosine transport by the flounder intestine, 257
Aspartate-induced neuronal necrosis in infant mice, protective effect of carbohydrate and insulin, 395

Cadmium chloride:
  acute oral intoxication, antagonists for, 77
  toxicity of inhaled, early responses of the antioxidant and surfactant systems in rat lungs, 241
Carbon monoxide at high altitude, body and organ weights of rats exposed to, 303
Chemical carcinogen-mediated induction of a marker oncofetal protein in rodents, repression by sustained-release β-glucuronidase inhibitors, 15
Coal liquefaction product, medium-boiling (154–378°C), dermal toxicity of in the rat, 193

Desbromoleptophos, effects of multiple dosing in young chicks, 217
1,3-Dichloropropene, tissue levels of glutathione following acute inhalation of, 171
Di-*n*-butyl-2,2-dichlorovinyl phosphate (DBCV), time course of electrophysiologic effects induced by, in the adult hen, 283
Dithiocarbamate-induced mobilization of cadmium deposits in mice, effect of zinc on, 91

Fenitrothion, effects of multiple dosing in young chicks, 217
Fenthion, effects of multiple dosing in young chicks, 217
Fyrol 6, an organophosphorus flame retardant, hepatic changes in rats following subchronic administration, 295

Glycol ethers, occupational exposure to within the semiconductor industry, assessment of developmental risks resulting from, 29

Helenalin, role of glutathione in the toxicity of, 159
Hexachlorobenzene (HCB) exposure in Fischer 344 rats, impairment of calcium homeostasis by, 311
Hydrogen chloride, effects of on respiratory response and pulmonary function of the baboon, 473
Hydrogen peroxide in isolated rat hepatocytes, DNA strand breaks induced by, 407
Hymenoxon, role of glutathione in the toxicity of, 159

Lead, effects of on viability and intracellular metal content of C6 rat glioma cells, 267

Mercurial inhibition of tyrosine transport by the flounder intestine, 257
Metalaxyl-induced bradycardia in rats, mediated by α-adrenoreceptors, 495
Monocrotaline pyrrole-treated rats, 6-ketoprostaglandin $F_{1\alpha}$ and thromboxane B_2 in isolated, blood-perfused lungs from, 127

Nitrobenzo[a]pyrene, 1-, 3-, and 6-, metabolism of by intestinal microflora, 527
Nitrogen dioxide, low-level with spikes, pulmonary function in juvenile and young rats, 229
1-Nitropyrene, lung, liver, and kidney as potential target organs after exposure to, as determined by the time course of covalently bound material, 445
N-Nitrosodimethylamine:
  exposure in mice, calcium transport, thiol status, and hepatotoxicity following, 321

N-Nitrosodimethylamine: (*Cont.*)
studies on the mechanism of the acute and carcinogenic effects of on mink liver, 183

Ochratoxin A-induced porcine nephropathy, renal enzyme activities, diagnostic potential of phosphoenolpyruvate carboxykinase and gamma-glutamyl transpeptidase activity, 1
Organophosphate-induced delayed neurotoxicity in 4-week-old chicks, effect of route of administration on the development of, 499
Organophosphorus esters:
toxicity of an acute dose in the chicken, 103
toxicity of repeated doses in the chicken, 115
Ozone, reduction of influenza virus pathogenesis by exposure to 0.5 ppm, 455

Permethrin, *cis-* and *trans-*, percutaneous absorption of in rhesus monkeys and rats, anatomic site and interspecies variation, 207
Phthalate chronic exposure, effects of on the kidney, 433

2-(2-Quinolyl)-1,3-indandione (D. C. yellow #11) in rats dosed orally or intravenously, disposition of, 385

Selenium and human health implications in California's San Joaquin Valley, 539
Sesquiterpene lactones, role of glutathione in the toxicity of, 159
Sulfur mustard, macromolecular metabolism of a differentiated rat keratinocyte culture system following exposure to, 507

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin:
morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with, 333
toxicity in yellow perch (*Perca flavescens*), 359
Trichloroethylene, studies of acute nephrotoxic potential in Fischer 344 rats, 147
